

biospray DISINFECTION MACHINE

The BioXSpray hospital disinfection machine removes nearly %100 of all viruses, yeasts, mould and harmful bacteria from places where there's a high likelihood of germs, viruses and parasitic elements.

It's an innovative solution and a future-proof answer to the ever-prevalent threat of superbugs – something that's absolutely critical in the healthcare industry.

The disinfectant sprayer breaks down water and oxygen in an environmentally friendly way to deal with the full spectrum of germs, bacteria, viruses and fungi inside public health areas. With uniform disinfection of each surface, including electronic ones, your hospitals, ambulances and patient rooms will be left refreshingly clean, with fresh oxygen-rich air that's free of all germs and other infectious particles.

- °360 horizontal rotation for homogeneous disinfection
- unique design
- adjustable flow rate and particle size
- 2 years extended warranty
